

Cell Holders

NOVONIX offers a number of cell holder configurations, designed for specific applications. All of our Cell Holders include:

- Fully isolated positive and negative voltage and current leads
- Option to connect 4-wire external RTD on all cell connectors
- Low contact resistance for all connectors (<10 mW)

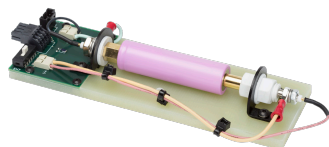

Standard Format Cell Holders

These cell holders carry a circuit board with an integrated RTD temperature sensor. They can accommodate Coin, Cylindrical (18650, 26650) and Pouch cells. (Maximum current: 5A)

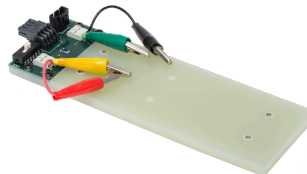

Coin Cell

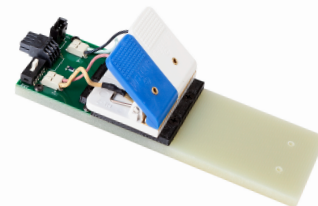

Cylindrical Cell

Pouch Cell**

**Clip
Pouch Cell**

Large Format Cell Holders

These cell holders have no integrated RTD, but provide a flying lead for an external RTD to be used. They may be connected directly to a 10A or 20A Channel Module or to a compatible NOVONIX Thermal Chamber. (Maximum current: 30 A)
